Program Overview:

Program provides attendees a view into logistics function and the benefits that can be realized by application of lean principles. Working alongside the instructors, students get an opportunity to breakdown the costs in logistics into logical buckets and evaluate the underlying drivers of the costs. Program offers opportunity for the participants to recognize cost trade-offs found in logistics and evaluate distribution network models. Participants will develop through understanding on critical criteria around carrier selection and carrier performance measures. Students will also look into new wave of transportation management systems, what these tools offers, benefits and trade-offs. Program provides an opportunity for the participants to understand key service and cost measures in logistics.

Learn about Logistics function, cost drivers and measures that can assist in identifying issues and opportunities for improvements. Get grounded in Lean Concepts and understand the application of the principles to Logistics. Review the shift in perspective in the industry, from Logistics as merely cost to operate to Logistics as a competitive advantage in today's dynamic business environment. Be able to evaluate the trade-offs and insights that you can take back to your business for immediate benefits.

Skills You'll acquire:

Lean Logistics program will help you develop solid knowledge on all aspects of Logistics function. After completing the program you will become more effective in your current operations role, be able to drive process improvement utilizing lean principles and make better business decisions about issues affecting your company.

Who should attend:

This program is designed for experienced supply chain and logistics professionals who are seeking to broaden their knowledge in the logistics, wanting to learn lean principles and their application in the Logistics.

The program is ideally suited for individuals who are looking for ideas to bring about change and drive improvements in their respective responsibility areas.

Format:

This is a instructor-led, 1-day eight hour workshop conducted in a highly interactive & hands-on learning environment.

Cost:

Contact us for more information about the cost structure.
