Who should attend?

Program Overview:

This Program Operations course offers an in-depth review of the key concepts, tools, and techniques that can assist in the selection, tracking and successful execution of the a portfolio of projects. Also covered is the in-depth review of typical issues surrounding projects and what that entails in terms of the capabilities needed. Participants will also review the three pillars of the governance model; Pre-project, including project selection and ROI; Dduring project i.e. standardized performance measures and milestone tracking; and post project ROI measures and lessons learned.

Course provides an in depth review of the roles and responsibilities of the Project Management Office (PMO) or Program Operation Group. Participants also look at the challenges faced by the group in working within various organizational structures, and what steps can be taken to overcome the challenges. Attendees will also get an opportunity to review, discuss and take back Solutions4Business' proprietary Program Operations deployment model,. Learn how to kick off the program, how to define the goals and success measures, define roles and responsibilities and build support structure for the project managers executing individual projects.

Skills You'll acquire:

The Program Operations course will help you to develop solid knowledge ofn project portfolio management and program management including project selection criteria's, ROI measures, and resource planning

Who should attend:

This program is designed for experienced project managers, project co-coordinators and analyst who are experienced in the art and science of project management and are looking to develop a robust understanding of the activities that are needed to manage portfolio of projects. This program is ideal for the business leaders who are looking for ideas on how to streamline project execution or looking to set up a centralized program management office to scale up the project support infrastructure.
